ABOUT ME

Computer Science student at the University of Gujrat with a strong interest in Data Analytics, Machine Learning, and Software Development. Skilled in Python, SQL, data visualization, statistical analysis, and MERN Stack development. Experienced in building AI and web-based projects, with Google Professional Certificates in Advanced Data Analytics and Cybersecurity. Passionate about solving real-world problems through data-driven insights and continuously learning modern technologies.

SKILLS

- **Programming**: JavaScript, Python, C++
- **Web Development (MERN Stack):** HTML, CSS, JavaScript, React.js, Node.js, Express.js
- **Data Analytics**: Python, SQL, Pandas, NumPy, Data Cleaning, EDA, Statistical Analysis, Data Visualization, Machine Learning, Regression Analysis, Feature Engineering, Predictive Modeling
- **Databases:** MongoDB, MySQL, SQL, Flutter Firebase
- **Mobile App Development**: Flutter, Dart, Firebase Authentication
- **Tools:** Git, Github , VS Code, Jupyter Notebook, Google Colab, Canva
- **Concepts:** OOP, Data Structures, Algorithms
- **Soft Skills:** Problem Solving, Communication, Teamwork, Quick Learner
- **Others:** MS Office (Word, Excel, PowerPoint), Canva, Basic Linux Commands

PROJECTS

Project Title:- Digital Marketing Website

- Designed a fully responsive front-end website using HTML, CSS, and JavaScript.
- Included sections for services, testimonials, contact forms, and animated banners.
- Focused on user-friendly layout, SEO basics, and mobile compatibility.
- Gained experience in layout design, UI/UX principles, and front-end logic.

Project Title: Online Storefront (General E-Commerce Template)

- Built a static e-commerce store template for selling general products. Created product cards, category sections, a navigation bar, and a checkout preview page. Integrated interactive UI elements using JavaScript. Gained skills in product layout, page structuring, and visual hierarchy.

Project Title: Online Food Ordering Website

- Developed a multi-page food delivery website using HTML, CSS, and JavaScript. Implemented menu sections, order forms, pricing lists, and image sliders. Emphasized clean layout, responsive design, and intuitive navigation. Practiced modular coding and basic client-side scripting for form validation.

EDUCATION

BS Computer Science *2023-2027*
University Of Gujrat (3 years completed)

Intermediate In Biological Sciences *2021-2023*
Punjab College Main Campus Boys Gujranwala (First Division)

Matriculation In Sciences *2019-2021*
Allied School (Gujranwala Board 3rd) Position

LANGUAGES

- English (Fluent)
- Urdu (Fluent)
- Punjabi (Fluent)

- **Completed several hands-on projects in C++, including games and logic-based programs using OOP and DSA concepts.**
- **Built and managed SQL databases for storing and retrieving structured data in academic and personal projects.**
- **Applied algorithms and data structures to solve real-world coding problems and optimize program performance.**

Certifications

- Google Advanced Data Analytics **(Google Certified)**
- The Power of Statistics
- The Nuts and Bolts of Machine Learning
- Stay Ahead of the AI Curve
- Regression Analysis (Simplify Complex Data)
- Maximize Productivity With AI Tools
- Introduction to AI
- Use AI Responsibly
- Google Advanced Data Analytics Capstone
- Go Beyond the Numbers Translate Data into
- Foundation of Data Science
- Foundation of CyberSecurity
- Discover the Art of Prompting
- Ai For App Building
- Accelerate Your Job Search with AI
- Introduction to cyber security fundamentals

Project Title: Sales Performance Analytics Dashboard

- Analyzed and cleaned sales datasets using Python, Pandas, and SQL.
- Performed Exploratory Data Analysis (EDA) to identify sales trends and customer behavior.
- Created interactive visualizations using Matplotlib to support business decision-making.
- Generated actionable insights through statistical analysis and data storytelling..

Project Title: Customer Churn Prediction System

- Developed a machine learning model to predict customer churn using Python and Scikit-learn.
- Performed data preprocessing, feature engineering, and model evaluation.
- Evaluated model performance using accuracy, precision, recall, and F1-score.
- Identified key customer retention factors through predictive analytics.

Project Title: AI Career Recommendation System

- Developed an AI-powered career recommendation system using Python, Flask, and machine learning.
- Performed data preprocessing, exploratory data analysis (EDA), and feature engineering.
- Implemented KNN, Decision Tree, and Random Forest models for career prediction.
- Built a responsive web interface with database integration and automated recommendation reports.
